Aspiring Software Engineer | AI Enthusiast | Problem Solver

Education

Institution	Degree	Duration	CGPA/%
Gokaraju Rangaraju Institute of Engineering and Technology (GRIET)	B.Tech (CSE)	2022 – Present	9.32/10 (Marksheet)
Sigma Junior College – TSBIE	Intermediate (MPC)	2020 – 2022	96% (Marksheet)

Experience

Intern – Packaged App Development Associate, Accenture

May 2025 – Jul 2025

- Completed Accenture's Packaged App Development Associate program, a structured onboarding initiative focused on enterprise application development practices and core programming concepts.
- Gained working knowledge of Agile and DevOps methodologies and data security fundamentals through structured training and practical exercises over the 2-month internship.

Projects

Frontdesk AI Receptionist

[GitHub Repo](#)

- Designed and built a human-in-the-loop AI receptionist system using **FastAPI**, **React**, and **Firebase Firestore**, with automatic escalation from AI to human supervisors.
- Integrated **OpenAI GPT-4**, achieving **85% query resolution** with **under 2-second average response time**, backed by a self-learning knowledge base built from supervisor responses.
- Built a real-time supervisor dashboard with **WebSocket**-based notifications, full request lifecycle tracking, and a **LiveKit**-based call simulator for testing.

Secure Bi-Directional Messaging System

[GitHub Repo](#)

- Engineered a secure messaging system using hybrid encryption (**RSA-2048 + AES-128 EAX**) for confidential customer-bank communication.
- Implemented **digital signatures** (RSA + SHA-256) for authenticity/integrity, with **nonce/timestamp-based replay protection** and key revocation support.
- Built a CLI demonstrating the full encrypted message lifecycle: compose → encrypt → sign → verify → decrypt.

AI SkillConnect

[GitHub Repo](#)

- Built a full-stack skill exchange platform (**React**, **Node.js**, **MongoDB**) enabling peer-to-peer skill exchange within gated communities.
- Implemented **AI-driven skill detection** and quiz-based validation (**OpenAI API**) to automatically assign proficiency scores from user profile summaries.
- Developed **skill-matching** and **peer-credit systems**, plus real-time chat via **Socket.io**; user-tested with 10 peers.

Technical Skills

Languages: Core Java, Python (DSA), SQL, HTML, CSS, C

Frameworks/Libraries: React, Node.js, Express.js, FastAPI

Databases: MongoDB, Firebase Firestore

Tools/Platforms: Git, GitHub, Postman, Socket.io, VS Code

Concepts: Data Structures & Algorithms, OOP, Cryptography & Security, Machine Learning, Data Analytics

Certifications

[Introduction to Artificial Intelligence](#) | [Machine Learning with Python](#) | [Introduction to Cyber Security](#)
